layko table

Frame

2 tubular rails 22 x 2 mm

Surface

Chrome (20 µm Bright Nickel + 5 µm Chrome)

Table top

beech-wood stained black

L&C stendal

→ In 1889 the ironmonger **Louis Arnold** and his son **Carl** founded the iron furniture factory in **Stendal**. → By 1926, the Arnold factories have emerged as **Europe's leading manufacturer of tubular steel furniture**: day-in, day-out, 1,400 workers turn out 1,200 pieces of garden furniture, 1,200 tubular steel bedsteads and 600 other pieces. → 1927 L. & C. Arnold show a collection developed by Mart Stam and made by Arnold, comprising **the first ever chair with no back legs** (cantilever chair). Designs from other Bauhaus artists were also executed. → 1936 the **airship Hindenburg** (LZ 129) is equipped with aluminium seating from L. & C. Arnold. → Following 1945, the Stendal factory is nationalised as "public property" and begins operating under the name of VEB STIMA. Chairs, tables and beds are manufactured for domestic GDR requirements and for export. → 1986/1987 L. & C. Arnold (VEB STIMA) makes more than a thousand chairs, armchairs and tables to furnish the historic **Bauhaus school in Dessau**. → After the reunification in 1989, the company gained a foothold once more in the German and European market. → Several classic Bauhaus pieces were revived in the **Arnold Bauhaus Collection**. Among other things, the historic Bauhaus refectory in Dessau was refurbished with tubular steel stools designed by Marcel Breuer and produced by L. & C. Arnold Stendal. → Later the **Stendal Collection** – re-editions from the fifties and new designs – augmented the L. & C. Arnold programme. → Since 1997 the company has been known as **L&C stendal**. Our range of products encompasses tables and chairs for public premises, high-capacity seating systems, supplementary furniture such as shelving, stools, coat racks etc., as well as high-quality Bauhaus pieces. layko

layko – exercises fascinating appeal in its contrast of materials: chrome, wood and leather and their perfect finish.

The **layko** table and stool are a perfect example of the simple and elegant tubular steel furniture construction that is pure Bauhaus. Its main design feature, the closed loop of tubular steel, is extremely strong, and with its timeless simplicity **layko** can be put to use in diverse environments.

The **layko** table as an all-round talent. It is equally ideal whether used as an unpretentious work or conference table in the office or as a supremely practical writing desk in a private environment. Moreover, **layko** cuts a fine figure as a compact, filigree dining table in classically modern home environments.

The **layko** stool is of use anywhere where a quick seating or storage solution is called for. It is available with leather upholstery.
